Education

NMAM Institute of Technology

August 2023 – May 2027 (Expected)

Bachelor of Technology in Information Science and Engineering

Expected Graduation: 2027

CGPA: 8.26

Relevant Coursework: Data Structures, Web Development, Machine Learning, Computer Networks, AWS Cloud Experience

AI Intern | NoviTech R&D Private Limited

February 2025 – March 2025

- Applied Machine Learning algorithms including regression, classification, and clustering to analyze datasets and develop predictive models for real-world use cases.
- Performed data preprocessing and feature engineering, including missing-value handling, normalization, encoding, and feature selection to improve model quality.
- Built and evaluated ML models using Python, Scikit-learn, and Jupyter Notebook, using accuracy, precision, recall, and confusion matrices to assess performance.

Data Analyst Intern | NoviTech R&D Private Limited

June 2025 – July 2025

- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) using Python, Pandas, and NumPy to identify trends and inconsistencies.
- Created interactive dashboards and visualizations using Power BI and Matplotlib to communicate insights and support data-driven decision-making.
- Prepared analytical reports and improved data workflows while collaborating with mentors and team members to present findings effectively.

Projects

NetSentinel – Network Observability & Troubleshooting Platform

August 2026 | Live Demo

- Built a network diagnostics platform with a rule-based engine monitoring TCP/IP, DNS, gateway reachability, and routing to auto-detect root-cause failures extended with a Backup Readiness module mapping NFS/SMB/iSCSI connectivity to RPO/RTO/SLA outcomes to predict backup job failures.
- Integrated a RAG-based LLM layer (Ollama/Groq) for incident summarization and a conversational diagnostics assistant, with grounded prompting to prevent hallucination.
- Delivered real-time dashboard with topology visualization, PDF audit reports, structured logging, fleet management, and 23-module test suite with CI/CD for repeatable, evidence-based troubleshooting.

Travora – AI-Powered Travel Social Networking & Hotel Discovery Platform

July 2026

- Developed a full-stack AI-powered travel platform enabling users to discover destinations, share experiences, connect with travel communities, and access personalized AI-driven travel assistance.
- Implemented authentication, travel content management, and real-time hotel data management using Next.js, React, TypeScript, Node.js, Supabase, and PostgreSQL.
- Designed an interactive web application integrating AI travel assistance, social networking, and hotel discovery into a unified travel platform.

Skills

Programming: Python, SQL

Computer Networks: TCP/IP, OSI Model, Subnetting, DNS, DHCP, ARP, TCP/UDP, ICMP, TCP Sockets, Routing, Network Troubleshooting

Cloud & Systems: AWS, Azure, Linux, Bash, Git, GitHub

Full Stack: Next.js, React.js, Node.js, Express.js, REST APIs, HTML, Tailwind CSS

Databases: MongoDB, PostgreSQL, Supabase, MySQL

Data Analytics: Excel, Power BI, Pandas, NumPy, Matplotlib, Data Cleaning, EDA, Data Visualization

Data Science & AI: Machine Learning, Scikit-learn, Deep Learning, TensorFlow, OpenCV, LSTM, Large Language Models (LLM), Retrieval-Augmented Generation (RAG), Prompt Engineering, Ollama, Groq API

Certifications

- AINNOVATION 2025 : Microsoft Azure Learning Challenge – September 18, 2025
- AINNOVATION 2025 : Applied AI Learning Challenge – September 19, 2025
- AWS Cloud Practitioner Essentials – August 02, 2026
- Networking Basics – Cisco Networking Academy, August 24, 2026
- Networking Devices and Basic Configuration – Cisco Networking Academy, August 31, 2026

Extracurricular

- Core member of Ripple Factor Crew at NMAM Institute of Technology.
- Won multiple dance titles and represented the college at state and national-level competitions.
